

Maintaining Immunosuppression & **KEEPING INFECTIONS AT BAY CAN BE A TIGHT ROPE WALK**

Diagnose opportunistic infections early with **RIVAARA LABS**

MDx solutions for the **IMMUNOCOMPROMISED**

ACE Panel Qual & Quant
(Adenovirus, Cytomegalovirus, Epstein-Barr Virus)

Adenovirus Qualitative

Adenovirus Quantitative

CMV Qualitative

CMV Quantitative

EBV Qualitative

EBV Quantitative

BK Virus Qualitative

BK Virus Quantitative

Sample type :

EDTA
whole blood

Sterile
body fluids

Sample volume :

3 mL

MDx solutions for **FUNGAL PATHOGENS**

Candida albicans

Candida glabrata

Candida krusei

Candida parapsilosis

Candida tropicalis

Aspergillus spp.

Pneumocystis jirovecii

Sample type :

EDTA
whole blood

Sputum/BAL
(LRTI)

Sterile
body fluids

3 mL

Sample volume :

MDx solutions for **TUBERCULOSIS**

Mycobacterium tuberculosis

Non-Tubercular Mycobacteria

Rifampicin drug resistance

Isoniazid drug resistance

Sample type :

EDTA
whole blood

Sterile
body fluids

Sputum/BAL
(LRTI)

Tissue

Sample volume :

3 mL

MDx solutions for opportunistic stool pathogens

COMPREHENSIVE GASTROENTERITIS PANEL

Astrovirus

Salmonella spp.

Adenovirus

Giardia duodenalis

Rotavirus

Clostridium difficile

Norovirus GI

Cryptosporidium spp.

Norovirus GII

Yersinia enterocolitica

Entamoeba histolytica

Campylobacter spp.

Verotoxigenic E. coli (VTEC)

Enteroinvasive E. coli (EIEC) / Shigella spp.

Sample type :

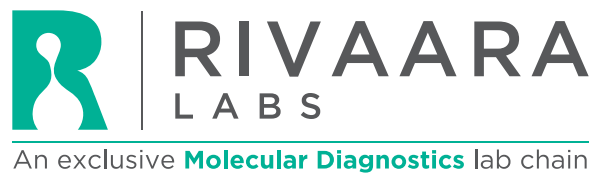

Stool

Sample volume :

25 mg

An exclusive **Molecular Diagnostics** lab chain
